## Publishing, Subscription and Advertising Offices

Pergamon Press plc, Headington Hill Hall, Oxford OX3 0BW (Oxford 794141; Telex 83177).

*Annual Institutional Subscription Rate* (1992): £230.00 (US\$370.00). *Two-year Institutional Rate* (1992/93): £437.00 (US\$703.00). Sterling prices are definitive. US dollar prices are quoted for convenience only, and are subject to exchange rate fluctuation. Prices include postage and insurance and are subject to change without notice. Personal Subscription Rate for those whose library subscribes at the regular rate is available on request from Pergamon Press offices.

Subscription rates for Japan include despatch by air and prices are available on application.

All prices are subject to change without notice.

*Subscription enquiries* from customers in North America should be sent to: Pergamon Press Inc., 395 Saw Mill River Road, Elmsford, NY 10523, U.S.A., and for the remainder of the world to: Pergamon Press plc, Headington Hill Hall, Oxford OX3 0BW, U.K.

*Back issues:* Back issues of all previously published volumes, in both hard copy and on microform are available direct from Pergamon offices.

Whilst every effort is made by the publishers and editorial board to see that no inaccurate or misleading data, opinion or statement appear in this journal, they wish to make it clear that the data and opinions appearing in the articles and advertisements herein are the sole responsibility of the contributor or advertiser concerned. Accordingly, the publishers, the editorial board and editors and their respective employees, officers and agents accept no responsibility or liability whatsoever for the consequences of any such inaccurate or misleading data, opinion or statement.

## NUMBER 1

### MINI REVIEW

**G<sub>i</sub>-2 is at the centre of an active phosphorylation/dephosphorylation cycle in hepatocytes: the fine-tuning of stimulatory and inhibitory inputs into adenylate cyclase in normal and diabetic states**

1 *M. D. Houslay*

### GENERAL PAPERS

**The differentiating agent, retinoic acid, causes an early inhibition of inositol lipid-specific phospholipase C activity in HL-60 cells**

11 *B. Geny, H. Cost, P. Barreau, M. Basset, C. Le Peuch, J.-P. Abita and S. Cockcroft*

**Pertussis toxin-sensitive G-proteins are not involved in activation of T-lymphocytes**

25 *J. Modesto, J.-P. Breittmayer, N. Grenier-Brossette, M. Fehlmann and J.-L. Cousin*

**Diacylglycerol production in Jurkat T-cells: differences between CD3, CD2 and PHA activation pathways**

35 *C. Pelassy, D. Mary and C. Aussel*

**Calcium stores in electroporabilized HL-60 cells before and after differentiation**

41 *F. J. Regateiro, C. M. Carvalho, I. L. Ferreira, V. A. Bairos and A. P. Carvalho*

**Subcellular distribution and phosphorylation state of insulin receptors from insulin- and isoproterenol-treated rat adipose cells**

51 *T. M. Weber, H. G. Joost, M. Kuroda, S. W. Cushman and I. A. Simpson*

**Effects of lithium ion on the inhibitory GTP-binding protein and its coupling response**

59 *Y. Watanabe, H. Kawamoto, T. Imaizumi, N. Sakagoshi, K. Iwakura, H. Morita, T. Iwasaki and H. Yoshida*

**Activation of phospholipase C is not correlated to the formation of prostaglandins and superoxide in cultured rat liver macrophages**

65 *P. Dieter, A. Schulze-Specking and E. Fitzke*

**The involvement of calcium and protein kinase C in modulating agonist-stimulated chemotaxis of human neutrophils**

73 *J. E. Merritt, M. Greener, T. J. Hallam and G. T. G. Swayne*

**Involvement of cellular calcium incorporated from the medium in production of inositol trisphosphate in A-431 cells**

79 *K. Hosoi, K. Sugita, Y. Shioda, A. Kodama and T. Ueha*

**Forthcoming papers**

## MINI REVIEW

The growth hormone binding protein as a paradigm of the erythropoietin superfamily of receptors

85 Z. Hochberg, T. Amit and M. B. H. Youdim

## GENERAL PAPERS

tsLA23-NRK cells need pp60<sup>v-src</sup> protein-tyrosine kinase activity in G<sub>2</sub> phase to initiate mitosis in serum-free medium

93 J. P. Durkin, T. Youdale and J. F. Whitfield

Role of Ca<sup>2+</sup> in t-PA production by human embryonic lung diploid fibroblast, IMR-90 cells, stimulated by proteose peptone

99 A. Suzuki, Y. Itagaki, N. Shima, S. Mitsuda, K. Higashio and G. Kawanishi

Desensitization of the EGF receptor alters its ability to undergo EGF-induced dimerization

107 D. Kuppuswamy and L. J. Pike

The ability of staurosporine to modulate pancreatic acinar cell desensitization by TPA, carbamylcholine and caerulein

119 J. Morisset, B. Paquette and O. Benrezzak

Ras proteins activate calcium channels in neuronal cells

127 J. Hescheler, F.-J. Klinz, G. Schultz and A. Wittinghofer

ADH-dependent phosphoinositide signaling system and prostaglandin E production in the frog urinary bladder

135 R. G. Parnova and D. L. Firsov

Epidermal growth factor and phorbol ester actions on the TSH induced down regulation of the isoenzyme I (PKA I) of cyclic AMP-dependent protein kinases in dog thyroid cell primary cultures

145 P. P. Roger, M. F. Breton, J. E. Dumont and M. Pavlovic-Hournac

Starvation of a clonal osteoblast-like cell line, MOB 3-4-F2, down-regulates prostaglandin E<sub>2</sub> receptors but increases cAMP response to prostaglandin E<sub>2</sub>

153 T. Kawase, M. Orikasa and A. Suzuki

Inhibition of phosphatidic acid production and lysophospholipid formation in collagen-stimulated human platelets by staurosporine, a protein kinase inhibitor

159 L. M. Thomas and B. J. Holub

### MINI REVIEWS

- Interplay between insulin signalling and protein kinase C 171 *G. Grunberger*

- The *ras* superfamily of molecular switches 179 *I. G. Macara*

### GENERAL PAPERS

- Interleukin-1 stimulation of arachidonic acid release from human synovial fibroblasts; blockade by inhibitors of protein kinases and protein synthesis 189 *L. A. Cisar, R. J. Schimmel and E. Mochan*

- Cyclic AMP-dependent protein kinase in mammary epithelial cells; activity and sub-cellular distribution are acutely modulated by isoprenaline 201 *R. A. Clegg and K. Connor*

- The Na<sup>+</sup>, K<sup>+</sup>-ATPase inhibitor ouabain and the Na<sup>+</sup> ionophore monensin have opposite effects upon carbachol-stimulated inositol phospholipid breakdown in rat cerebral cortical miniprisms 209 *G. Tiger and C. J. Fowler*

- Studies on the mechanisms of signalling and inhibition by pertussis toxin of fibroblast growth factor-stimulated mitogenesis in Balb/c 3T3 cells 215 *A. Logan and S. D. Logan*

- Regulation of 1,4-dihydropyridine and  $\beta$ -adrenergic receptor sites in coronary artery smooth muscle membranes 225 *J. Drimal*

- mRNA and protein levels of the stimulatory guanine nucleotide regulatory protein G<sub>s</sub> are lower in the testis of obese (ob/ob) mice 233 *N. McFarlane-Anderson and N. Bégin-Heick*

- Human neutrophils have a novel purinergic P<sub>2</sub>-type receptor linked to calcium mobilization 243 *J. E. Merritt and K. E. Moores*

- Temperature and benzyl alcohol as probes of the antilipolytic mechanism of insulin action in adipocytes 251 *P. A. Hyslop, C. E. Kuhn and R. D. Sauerheber*

- Defective protein kinase C-mediated actions in cystic fibrosis neutrophils 259 *I. Graff, A. Schram-Doumont and C. Szpirer*

Forthcoming papers

## NUMBER 4

## MINI REVIEWS

- Centrosome signalling at mitosis** 267 *H. Sakai and K. Ohta*
- Stimulated phosphatidylcholine hydrolysis as a signal transduction pathway in mitogenesis** 273 *S. J. Cook and M. J. O. Wakelam*
- The nature and mechanism of activation of the hepatocyte receptor-activated  $\text{Ca}^{2+}$  inflow system** 283 *G. J. Barritt and B. P. Hughes*

## GENERAL PAPERS

- Protein kinase C-dependent activation of a myelin basic protein kinase by gastrin-releasing peptide in Swiss 3T3 fibroblasts** 293 *A. Hansson*
- Differences in the accessibility of the  $\beta$ -adrenergic receptor in isolated hepatocytes from foetal and adult rats** 299 *T. Hermsdorf, D. Dettmer and E. Hofmann*
- Characterization of multiple forms of phosphoinositide-specific phospholipase C from bovine aorta** 305 *M. Späth, R. Woscholski and C. Schächtele*
- Expression of val-12 mutant *ras* p21 in an IL-3-dependent murine myeloid cell line is associated with loss of serum-dependence and increases in membrane  $\text{PIP}_2$ -specific phospholipase C activity** 311 *M. T. Rizzo, H. S. Boswell, D. English and T. G. Gabig*
- Transformation by the *k-ras* oncogene correlates with increases in phospholipase A2 activity, glycerophosphoinositol production and phosphoinositide synthesis in thyroid cells** 321 *S. Valitutti, P. Cucchi, G. Colletta, C. Di Filippo and D. Corda*
- A quantitative analysis of the role of  $\text{K}^+$  channels in mitogenesis of neuroblastoma cells** 333 *B. Rouzair-Dubois and J.-M. Dubois*
- The transduction signalling protein  $\text{G}_o$  during embryonic development of *Drosophila melanogaster*** 341 *A. Guillén, M. Sémériva, J. Bockaert and V. Homburger*
- Purification of liver membranes highly enriched in phosphatidylinositol kinase** 353 *H. Olsson, A. Persson and B. Jergil*

# Contents

- Oxidized low-density lipoprotein antagonizes the activation of purified soluble guanylate cyclase by endothelium-derived relaxing factor but does not interfere with its biosynthesis 361 *K. Schmidt, W. F. Graier, G. M. Kostner, B. Mayer, E. Böhme and W. R. Kukovetz*

Erratum 369

Forthcoming Papers i

## NUMBER 5

### MINI REVIEWS

- Biochemical and functional interactions between the inositol 1,4,5-trisphosphate- $\text{Ca}^{2+}$  and cyclic AMP signalling systems in smooth muscle 371 *A. A. Abdel-Latif*

- Mechanisms of receptor-mediated regulation of Na-H exchange 387 *D. L. Barber*

### GENERAL PAPERS

- Intracellular mechanisms involved in leukotriene  $\text{C}_4$ -stimulated adhesion of U-937 cells 399 *G. Skoglund and H.-E. Claesson*

- Effect of cell density on growth regulation of human glomerular epithelial cells. Inhibition of growth by dbcAMP and cAMP-elevating agonists 405 *M. M. Späth, H. Pavenstädt, T. Kirste, J. Pfeilschifter, C. Wanner and P. Schollmeyer*

- Effects of homo- and heterodimeric isoforms of PDGF on signalling events in rat renal mesangial cells 413 *J. Pfeilschifter and M. Hosang*

- Evidence that metabolically active synaptosomes lack functional cyclic AMP-dependent protein kinase 425 *G. S. Dhillon and M. L. Koenig*

- The proteolysis of membrane-associated protein kinase C as a possible component of the signalling pathway leading to c-myc induction in B lymphocytes 435 *K. E. Pollok and E. C. Snow*

- Intracellular  $\text{Ca}^{2+}$  regulation in CD3 stimulated Jurkat T cells involves  $\text{H}^+$  fluxes 453 *P. Berthe, J.-L. Cousin and J.-P. Breittmayer*

# Contents

Distribution of arrestin-like protein and $\beta$ -subunit of GTP-binding proteins in quail choroid plexuses	461	J. Oliver, M. Mirshahi, S. Herbute, S. Peraldi-Roux, L. Trebuchon, P. Brisson, J.-P. Collin, J.-P. Faure and J. Gabrion
Effects of normal and mutant <i>ras</i> genes on inositol lipid metabolism in <i>Dictyostelium</i>	473	C. A. Wood, G. N. Europe-Finner and P. C. Newell
Interleukin-4 activates ion channels in B lymphocytes	483	F. V. McCann, D. C. McCarthy and R. J. Noelle
Forthcoming Papers	i	

## NUMBER 6

### MINI REVIEWS

GTP binding proteins and growth factor signal transduction	491	H. E. Ives
Phosphoinositide 3-kinase: a new effector in signal transduction?	501	C. P. Downes and A. N. Carter
Autocrine versus lymphocyte-dependent mechanisms for macrophage activation	515	R. M. Schultz

### GENERAL PAPERS

<i>In vitro</i> , insulin receptor catalyses phosphorylation of clathrin heavy chain and a plasma membrane 180,000 molecular weight protein	523	H. J. Goren, M. J. Mooibroek and D. Boland
Mechanisms involved in platelet activation induced by a monoclonal antibody anti glycoprotein IIb-IIIa: inositol phosphate production is not the primary event	537	C. Bachelot, J. C. Sulpice, F. Giraud and F. Rendu
Dual coupling of the cloned 5-HT <sub>1A</sub> receptor to both adenylyl cyclase and phospholipase C is mediated via the same G <sub>i</sub> protein	547	A. Fargin, K. Yamamoto, S. Cotecchia, P. K. Goldsmith, A. M. Spiegel, E. G. Lapetina, M. G. Caron and R. J. Lefkowitz
Oxysterol activation of arachidonic acid release and prostaglandin E <sub>2</sub> biosynthesis in NRK 49F cells is partially dependent on protein kinase activity	559	Z. Lahoua, H. Vial, F. Michel, A. Crastes de Paulet and M. E. Astruc
Transformed 3T3 cells have reduced levels and altered subcellular distribution of the major PKC substrate protein MARCKS	569	J. C. Reed, U. Rapp and M. P. Cuddy
Dual effects of ATP on phosphatidylinositol breakdown in rat hepatocyte membranes	577	J. Ibarrondo, A. Marino, G. Guillon, M. Trueba and J. M. Macarulla

# Contents

Evidence for the simultaneous translocation of muscarinic acetylcholine receptor and G protein by carbachol	587	<i>A. K. S. Ho, Y.-J. Zhang, R. Duffield and G.-M. Zheng</i>
Effect of fluoride, pertussis and cholera toxin on the release of arachidonic acid and the formation of prostaglandin E <sub>2</sub> , D <sub>2</sub> , superoxide and inositol phosphates in rat liver macrophages	599	<i>A. Schulze-Specking, J. Duyster, P. J. Gebicke-Haerter, S. Wurster and P. Dieter</i>
Solubilization of rat liver inositol 1,4,5-trisphosphate receptor	607	<i>J. M. Bond and C. W. Taylor</i>
Diabetes decreases sensitivity of adipocyte lipolysis to inhibition by G <sub>i</sub> -linked receptor agonists	613	<i>D. Saggerson, M. Orford, K. Chatzipanteli and J. Shepherd</i>
Release of azurophilic granule contents in fMLP-stimulated neutrophils requires two activation signals, one of which is a rise in cytosolic free Ca <sup>2+</sup>	625	<i>H. W. M. Niessen, T. W. Kuijpers, D. Roos and A. J. Verhoeven</i>
Priming of calcium mobilization in human neutrophils by granulocyte-macrophage colony-stimulating factor: evidence for an involvement of phospholipase D-derived phosphatidic acid	635	<i>P. H. Naccache, B. Hamelin, M. Gaudry and S. Bourgoin</i>
Forthcoming Papers		i

## Cellular Signalling

**Aims and Scope:** This journal will publish original papers covering all aspects of mechanisms, actions and structural components of cellular signalling systems. The emphasis will be on the production, regulation, degradation and action of second messengers; the structure, regulation and action of receptors; guanine nucleotide regulatory proteins; effector systems, such as tyrosyl kinases, adenylate and guanylate cyclase and ion channels; the effect of cellular signalling events on the functioning, growth and differentiation of target cells in normal and pathological states and also cellular oncogenes. Within the scope of the journal, manuscripts dealing with biochemistry, cell biology, molecular biology, pharmacology, neurobiology, molecular endocrinology and molecular oncology will be welcomed. The journal will also publish short original reviews on topical subjects.

### INSTRUCTIONS TO AUTHORS

*Cellular Signalling* will endeavour to give authors as rapid a decision as possible concerning the acceptability of their manuscript. Final decisions concerning acceptability will be made both on the novelty of the work and its scientific content.

*Cellular Signalling* will accept original research papers written in a concise style which describe key findings. Manuscripts should be submitted in triplicate to the Editorial Office.

*Cellular Signalling* will also publish topical *mini reviews* of approximately 2000–3000 words. In general these occasional contributions will be solicited by the Editorial Board. However, intending contributors should send a brief summary of their proposed *mini review* to the Editorial Office for comment on its possible acceptability.

*Cellular Signalling* will also publish *Comments* on published work. These will be short statements which are generally not longer than 450 words. They will be subject to the normal editorial reviewing procedure.

**Manuscripts**, in triplicate, should be sent by air mail or first class post (U.K.) to the Editor-in-Chief:

Professor Miles D. Houslay  
Cellular Signalling  
Molecular Pharmacology Group  
Department of Biochemistry  
University of Glasgow  
Glasgow G12 8QQ  
Scotland, U.K.  
Telephone No.—041 339-8855 Extn. 5903  
Telex—777070 UNIGLA

**Form of manuscripts.** These should be in English, typewritten on one side of the paper only and with double-spacing. A margin of approximately 3 cm should be left.

The first page should contain the *title of the paper*, first and last names of each author, the name of the author to whom correspondence should be addressed, the addresses of the authors, a running title of less than 75 characters and 6–8 keywords. The next page should contain a short abstract of the article in less than 150 words. Any abbreviations should also be defined here. The main body of the paper should then start on the following page with:

**Introduction**—short, concise but sufficient to service the needs of readers with different backgrounds;

**Materials and Methods**—all methods should be thoroughly described in sufficient detail to allow easy reproduction of the techniques employed. The source and quality of materials used should be given;

**Results**—clearly set out with appropriate subheadings;

**Discussion**—this should be succinct, detailing the key findings of the study, their importance and implications. In some instances it may be useful to combine the 'Results' and 'Discussion' sections for clarity and to avoid repetition.

**Acknowledgements**—should be given at the end of the text.

**Tables and Illustrations**—should be presented separately from the text. They can be submitted as glossy photographs; line-art in black ink on white card or tracing paper; as high resolution laserprinter output on white paper. The relevant number should be given on the reverse of each of the figures/tables together with the name of the senior author. All figures/tables require separate legends with sufficient detail to allow easy interpretation. Authors should indicate in the margin of their manuscript the optimal position for placement of figures and tables. Colour photographs can be printed but extra costs will be charged to the authors. Estimates will be given on request.

**References**—these should appear sequentially in the text and be referred to as numbers in brackets. At the end of the text, references should contain, in the following order, the name and initials of all authors, the year of publication, the appropriate journal abbreviation, volume number and both first and last pages of the paper. For books add the editor, the publisher and address, the number of volume, inclusive page numbers and year of publication. Any results quoted as 'personal communication' should be accompanied by written permission from the relevant person.

Examples:

1. Meyer B. J. and Casson L. P. (1986) *Cell* 47, 871–881.
2. Allfrey V. (1959) *The Cell. Biochemistry, Physiology, Morphology* (Brachet J. and Mirsky A. E., Eds). Academic Press, New York, 200–208.

**Footnotes**—should be placed at the bottom of the page to which they apply and numbered consecutively in the text.

**Proofs**—essential additions may be placed at the end of an article but any changes will be done at extra cost to the authors. Proofs will be sent to the authors for return within 48 hours of receipt.

**Offprints**—25 offprints of each article will be supplied free of charge to the corresponding authors. Additional offprints can be ordered on payment using the reprint order form which will accompany page proofs.

Reporting on one of the most wide-spread diseases facing our population

# ALCOHOL

## AN INTERNATIONAL BIOMEDICAL JOURNAL

Editor-in-Chief: R.D. Myers,  
Departments of Psychiatry and Pharmacology, East Carolina University School of Medicine,  
Greenville, NC 27858 USA

**O**f immense value to both practitioners and basic scientists alike, ALCOHOL is the major international journal devoted solely to biomedical research on alcohol and alcoholism. Appearing bi-monthly, ALCOHOL features original research articles, reviews, theoretical papers, and rapid communications. The "Reviews and Comments" section is devoted to brief reviews of recent literature and summaries of presentations at major meetings.

The journal is dedicated to excellence and in-depth reporting of the burgeoning literature on alcoholism as a disease state. Topics in this regard include:

- Biomedical factors in the etiology of alcoholism
- Biological and biochemical markers in the identification of alcoholism
- New drugs and chemotherapeutic strategies in the treatment of uncontrolled drinking, alcohol withdrawal, and psychological problems associated with the disease
- Fetal alcohol syndrome.

### Subscription information for ALCOHOL

ISSN: 0741-8329 Volume 8, 1991 6 issues per annum  
Institutional Subscription Rate (1991) US\$375.00  
Two-year Institutional Rate (1991/92) US\$712.50  
Individual Subscription Rate (1991)\* US\$ 77.00

\*Available only to those whose libraries subscribe.

### FREE SAMPLE COPY UPON REQUEST

Prices are subject to change without notice. Advertising rate card available on request. Back issues and current subscriptions are also available in microform. The Dollar prices shown include postage and insurance. For subscription rates outside the Americas, apply to your nearest Pergamon office.

### Indexed/Abstracted in

Excerpta Medica, Current Contents/Life Sciences, Science Citation Index, ISI/BioMed, Current Awareness in Biological Sciences (CABS) and BIOSIS.

### Recent Articles

C. Zimbat, J. Kril, C.G. Harper, and P.F. Nixon (Australia); Progression of neurological disease in thiamin-deficient rats is enhanced by ethanol.

G. Colombo, E. Mosca, G.L. Gessa, and F. Fadda (Italy); Suppression of ethanol intake in ethanol-preferring rats by 1,4-butanediol.

S.E. Tan, R.F. Berman, E.L. Abel, and C.S. Zajac (USA); Prenatal alcohol exposure alters hippocampal slice electrophysiology.

G.J. Gatto, J.M. Murphy, W.J. McBride, L. Lumeng, and T.-K. Li (USA); Effects of fluoxetine and desipramine on palatability-induced ethanol consumption in the alcohol-nonpreferring (NP) line of rats.

B.T. Davies (USA) and L.A. Parker (Canada); Novel versus familiar ethanol: A comparison of aversive and rewarding properties.

## NEUROPHARMACOLOGY

Editors-in-Chief: **P B BRADLEY**, *The Medical School, Birmingham B15 2TJ, UK* and  
**E COSTA**, *FIDIA-Georgetown Institute for the Neurosciences, 3900 Reservoir Road, Washington,  
DC 20007, USA*

*Neuropharmacology* publishes original research papers concerned with the actions of drugs and other biologically active substances on the central and peripheral nervous systems in animals and man. Its principal aim is to further the understanding of the mechanisms of drug action on the nervous system and to facilitate communication between the different scientific disciplines, and between basic science and clinical investigation. The journal encourages articles on molecular pharmacology, electrophysiological pharmacology, cytochemical neuropharmacology, and behavioural pharmacology or psychopharmacology. Publication is normally within six months of acceptance.

### A Selection of Papers

**R GODBOUT, Y CHAPUT, P BLIER & C DE MONTIGNY** (Canada), Tandospirone and its metabolite, 1-(2-pyrimidinyl)-piperazine-1. Effects of acute and long-term administration of tandospirone on serotonin neurotransmission.

**E CHOJNACKA-WÓJCIK & E PRZEGALINSKI** (Poland), Evidence for the involvement of 5-HT<sub>1A</sub> receptors in the anticonflict effect of ipsapirone in rats.

**G TEUCHERT-NOODT & R R DAWIRS** (FRG), Age-related toxicity in prefrontal cortex and caudate-putamen complex of gerbils (*Meriones unguiculatus*) after a single dose of methamphetamine.

**H BACHELARD, R RIVEST & C A MARSDEN** (UK), Posterior hypothalamic receptors involved in the cardiovascular changes elicited by electrical stimulation of the rostral ventrolateral medulla.

**G-Z ZHOU, A G KATKI, S SCHWARZ, P J MUNSON & D ROBBARD** (USA), Quantitative characterization of multiple binding sites for phencyclidine and *N*-allylnormetazocine in membranes from rat and guinea pig brain.

**Indexed/Abstracted in:** *Current Awareness in Biological Sciences (CABS), Curr Cont ASCA, Excerpt Med, Ind Med, MEDLINE, Psychol Abstr, Biosis Data, PASCAL-CNRS Data, Curr Cont / Life Sci, Curr Cont ISI/BIOMED Data, Curr Cont Sci Cit Ind, Curr Cont SCISEARCH Data*
